

Further consolidation of the media serves only private interests, not the public. The FCC is supposed to protect our, the public's, interests--therefore I urge you to not allow further consolidation!

Media is boring already because it gives only a narrow view, it is not diverse. We have to go to foreign media to hear anything but the same tired rhetoric repeated over and over by every source in this country. Please don't drive the American people even further away by making the media even more entrenched in this narrow slot.

I urge you to not allow this further consolidation! The public can be served only by diversity and that will suffer even more if you allow this to go through.
